## **Mabry Road Drainage Project**

### **Project Description**

The project includes the installation of a new pipe system which will increase the capacity of the drainage system in the area. The upgraded system will be capable of receiving the offsite water flow and routing the majority of the flow directly to the outfall at Marsh Creek. The pipes range in size from 42" to 60" and will run south along the east side of Glenridge Drive then east under the southern travel lane of Mabry Road. The system continues east along Mabry Road and outfalls directly into Marsh Creek upstream of the current existing outfall.

### **Project Sequencing**

Work on the project will begin near the outfall to Marsh Creek and will generally progress up Mabry Road toward Glenridge Drive and then up Glenridge to the connection with the existing storm system on the west side of the road. The median island on Mabry Road on the project side of the roundabout may be temporarily removed during the construction period to facilitate construction equipment.

### **Project Staging**

Equipment and materials will be staged on site in the Bayvale Court NE Cul-de-sac.

### Project FAQ's

**Question:** Why is the project located on the south side of Mabry Road?

**Answer:** This was done to avoid utilities, especially the water main, and to limit the disturbance to properties within the project area.

**Question:** Will there be utility disruptions?

**Answer:** Yes. Some utilities will need to be relocated/altered requiring temporary outages, and will be coordinated with homeowners.

**Question:** Are all workers in the project area working on the drainage project?

**Answer:** No. There is utility work scheduled to take place in the project area during construction. If you have concerns, please call the City of Sandy Springs Call Center, (770) 730-5600 and provide as many details as possible.

**Question:** How will traffic be affected by the project?

**Answer:** One lane will remain open at all times during construction, and flagmen will control traffic flow during construction. Driveway access will be coordinated with homeowners during construction.

**Question:** How will I know if my property will be affected by the construction?

**Answer:** All property owners affected by the construction have been contacted by the City.

**Question:** Will my driveway/yard be repaired if it's within the construction limits?

**Answer:** Yes. All driveways and yards affected by the construction will be restored.

## SANDY SPRINGS

GEORGIA

**Question:** What are the work hours allowed for the construction?

**Answer:** Monday through Friday from 8am to 5pm. Lane closures are limited on Glenridge Drive to the hours between 9am and 4pm.

**Question:** Will the road be resurfaced after completion?

**Answer:** Yes. The road will be resurfaced within the affected areas.
