- EMC
  - Offering three notification and verification packages, all in compliance with the ordinance. There are basic notification packages for those customers who have adequate equipment installed to self-verify along with more comprehensive packages, which will allow EMC Security to verify alarms from its central station.
  - EMC implemented some technology formerly available only to its commercial customers with the hopes of having a solution that will fit the security and budget needs for a wide variety of residents and business owners.
  - In discussion with several guard response companies to add guard response as fourth option.
