

CITY OF SANDY SPRINGS, GEORGIA

Government Green Fleet Policy

PURPOSE

The purpose of this policy is to provide guidelines for the purchase and use of vehicles that contribute to improved air quality.

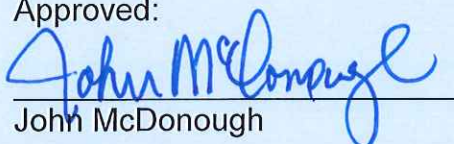

POLICY

Environmentally Preferable Vehicles

In determining which vehicles to purchase, the City shall integrate environmental factors into the City's procurement decisions, when practicable. At a minimum, the City shall:

1. Purchase non-emergency fleet vehicles that provide the best available net reduction in vehicle fleet emissions, including but not limited to the purchase of alternative fueled and hybrid vehicles;
2. Consider purchasing lower emission emergency fleet vehicles with comparable specifications for performance, safety, and fuel availability during emergencies as conventionally-powered emergency fleet vehicles.

Approved:

John McDonough
